

Preventive Maintenance for Airplanes

There is no better way to learn the systems of an airplane than to participate in the maintenance process. This seminar will focus on the preventive maintenance tasks the owner/operator/renter can perform on an aircraft. We will discuss the preventive maintenance items permitted under Part 43- Appendix A, the tools and procedures required, and most importantly, correctly completing the aircraft maintenance records. In addition, we will touch on how experimental / amateur built aircraft fall into Part 43. Please click on the link below to register for this interesting event!

Directions: Please see map link for directions, the presentation will be held on the first floor of the Fixed Base Operator's (FBO) facility.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
